[Gmail: mohamed.abuelyazeed0@gmail.com](#) | [LinkedIn](#) | [GitHub](#)

OBJECTIVE

Data Analyst with a strong passion for transforming complex data into clear, actionable insights that drive business impact. Skilled in SQL, Python, Power BI, and Excel, with hands-on experience in data cleaning, analysis, and visualization. Familiar with data engineering concepts including ETL/ELT processes and data modeling. Able to communicate findings effectively through dashboards and data storytelling to support informed decision-making.

EXPERIENCE

Marketing Data Analyst Mountain Marketing & Development	Dec 2025 – Present Part-time Remote
- Analyzed paid ads, social media, and web traffic data across multiple campaigns to identify performance gaps and support campaign optimization efforts. - Built Power BI and Excel dashboards tracking KPIs such as conversion rate, CAC, and campaign performance – reducing manual reporting time by ~6 hours/week. - Cleaned, transformed, and analyzed datasets using SQL and Python to ensure data accuracy and support consistent reporting workflows. - Provided insights on audience behavior and channel performance to support marketing decisions on targeting and budget allocation, improving campaign efficiency.	
Data Analyst Intern Digital Egypt Pioneers Initiative – DEPI	Nov 2025 – May 2026 Internship Hybrid
- Mastered the data lifecycle from foundations to data-driven decision-making, ensuring data quality and governance throughout the analysis process. - Utilized SQL, Python, and Power Query to extract, transform, clean, and preprocess complex datasets, ensuring high data integrity for analytical modeling. - Performed deep-dive analysis and trend identification using Excel to support data-driven decision-making processes. - Developed interactive dashboards and automated reports in Power BI and Tableau to translate technical findings into actionable business insights.	

PROJECTS

Layoffs Analysis GitHub Link
- Built an end-to-end ETL pipeline analyzing 1,900+ global layoff records, transforming raw data into an executive-level Power BI dashboard. - Cleaned and standardized data using SQL and performed EDA to identify trends, rolling totals, and top impacted companies and industries. - Developed DAX measures and designed a multi-page Power BI dashboard using star schema modeling to enhance analytical insights and performance.
Sales Analysis GitHub Link
- Engineered an end-to-end ETL pipeline for 60,000+ records, resolving schema inconsistencies across 7 relational datasets. - Performed Exploratory Data Analysis (EDA) using Seaborn and Matplotlib, identifying the Western Region as a 30% volume contributor. - Developed 8+ complex DAX measures (ROI, Profit Margin) to provide real-time visibility into growth drivers.

EDUCATION

B.Sc. in communications and electronics engineering. Mansoura Higher Institute of Engineering and Technology.	Sep 2020 – June 2025
Graduation project: A+ View Project	

SKILLS

Technical Skills:
Programing & Querying: Python (Pandas, NumPy, Matplotlib, Seaborn,PySpark), SQL (CTEs, MYSQL, PostgreSQL) Data Analysis & Visualization: Power BI (DAX, Power Query, Data Modeling, Charts), Excel (PivotTables, Pivot Charts, Macros, Power Pivot, Functions). Tools & Platforms: Git/GitHub, MS Office (Word, PowerPoint), Jupyter Notebook, Command Line Data Engineering : ETL/ELT Pipelines, Data Modeling, Data Warehousing, OLAP, OLTP , Data Cleaning, EDA, Data Modeling , Star-Schema Architecting , Snowflake-Schema Architecting. Other: C , javascript , Node-js , linux
Soft Skills: Problem-Solving, Analytical Thinking, Attention to Detail, Analytical Thinking, Data Storytelling, Data-Driven Decision Making, Presentation Skills, Team collaboration

CERTIFICATES

- Data Analyst in Power BI - Datacamp [show certification](#)
- Data Analyst in Python - Datacamp [show certification](#)
- Data Analysis with Excel Power Tools - Datacamp [Show certification](#)
- The science of statistics for the purposes of data science and artificial intelligence - Unihance [Show certification](#)
